SPARE AND SERVICE PARTS COMPATIBLE WITH VOLVO PENTA AND YANMAR

WE MAKE THINGS WORK – SINCE 1957

Olsson Parts stands for experience, expertise and quality. And we've done so ever since 1957, when Kaj Olsson established the company. Today, we are leaders in our sector in the Nordic Region, supplying parts not only for tractors and construction machinery, but also for marine diesel engines.

After nearly seven decades serving our sector, Olsson Parts is still a dependable family business with its head office and warehouse in Ellös, Orust Municipality, on the west coast of Sweden.

We currently employ around a hundred people. For many of us, engines and spare parts are personal passions outside of the company, too. Which is why you can be sure we know what we're selling.

Search by reference number – find the right part straight away

Do you have an OEM or reference number from another brand? At olssonparts.com you can search directly by reference number and quickly find compatible parts – whether for Volvo Penta, Yanmar or other engines.
