

## **Pressure outlet, part number 29008 (1)**

Connected to the diverter valve and in the mounting bracket's upper connection. Quick coupling of the push-pull type.

## **Return outlet, part number 29009 (2)**

Dismantle the hex plug on the hydraulic cover's left-hand side for connection of the return outlet. The supplied adapter with a tapered thread is mounted here. Quick coupling of the push-pull type.

If both the connections on the diverter valve are not used, the other must be plugged. Use a 3/8" plug 60219-06.

O-rings and nylon rings in the riser pipe are also included
